

APPLIED PRACTICES GRANT

An initiative of the AQHF Equine Research Program

The American Quarter Horse Foundation (AQHF) seeks to advance relevant basic and applied research that enhances the well-being of the American Quarter Horse. Our vision is to foster innovative equine research and education that leverages collaborative resources with exceptional scientists to address fundamental issues facing both the AQHA membership and the broader horse industry.

The AQHF Applied Practices Grant was created in 2024 with the goal to provide real-world application and relevance of scientific research and how its findings ensure continued best practices and appropriate strategies for horse care and management.

Who is Eligible?

- Young Investigators
- Emerging Researchers
- Established Investigators

Research Objectives

Proposals should be one-year in length and structured in a manner to address questions that will provide horse owners with information on how they can improve the care and welfare of their horses in a reasonable and practical manner at completion of the proposed research. Anticipated results from these proposals are expected to be more widely applicable and of interest to a large segment of the AQHA membership. Project proposals should be developed with special attention to AQHF's identified areas of research interest and the following programmatic objectives:

- Enhance the well-being of the American Quarter Horse.
- Advance impactful research for practical application.
- Produce research innovation through basic and applied sciences.
- Promote findings to peers, clinicians, and industry stakeholders.
- Foster education and training of future researchers.
- Increase collaboration within the research industry.

Grant Funding

Proposed projects in the applied practices category are limited to a maximum grant of \$35,000. Grants are awarded annually for the funding period of October 1 through September 30. Please be advised of the following budgetary limitations:

- Proposals may include the purchase of materials classified as capital equipment for up to \$5,000 of the proposed budget. Requests will require a detailed justification, including an explanation for funding procurement (i.e., matching funds available, etc.).

- AQHF will support the lease of equipment. Justification must be provided within the proposal regarding terms and length of the service contract.
- AQHF will fund salaries of additional personnel such as lab technician(s), graduate student(s) and student worker(s).
- AQHF will fund graduate student salaries or tuition at the resident rate, provided more than 50% of the student's time is being spent on the project and documentation accompanies the grant proposal (i.e., copy of tuition and fees for graduate students from the university catalog).
- AQHF will fund benefits based on time committed to the proposed project. Documentation outlining the formula for determining fringe benefits and items included as fringe benefits must accompany the grant proposal.
- AQHF will fund consumable supplies, service contracts and publication costs.
- AQHF will fund the purchase, lease, and care of horses. If horses are purchased, salvage value must be documented and deducted from the cost. Additional requirements regarding the use of client-owned horses are outlined within the AQHF Equine Research Program Guidelines.
- AQHF will not fund salary of principal investigator(s) or indirect costs such as facilities and administration costs, etc.
- To increase graduate student participation within the proposed research, AQHF chooses to support graduate travel stipends in place of related overhead expenses. Stipends in the amount of \$1,500 for domestic travel or \$2,000 for international travel may be requested per student, with a maximum of \$5,000 available for student travel.

Research Expectations

With programmatic objectives to promote research findings and foster education, graduate student travel stipends will be awarded with the expectation that upon completion of the research, student(s) have an abstract accepted and present their findings at scientific conference (i.e., AAEP Laminitis Symposium, Equine Science Society Symposium, Havemeyer Horse Genome Workshop, etc.) with appropriate acknowledgement of AQHF's support.

Deadline for submission of pre-proposals is October 1. AQHF equine research grants are awarded annually for the funding period of October 1 through September 30. Applications for funding should conform to the AQHF research program grant proposal format.

To apply online, visit our web site at <https://aqhfoundation.smapply.io>. Questions may be directed to the American Quarter Horse Foundation at (806) 378-5029 or foundation@aqha.org.

The American Quarter Horse Foundation is the related philanthropic organization of the American Quarter Horse Association and is incorporated to encourage, by public contribution, the support of worthwhile educational, charitable and research projects of interest and benefit to the devotees of the American Quarter Horse.
